Introduction v

Notations xi

1. One complex variable

1.1 *Schwarz's lemma and Riemann surfaces* 3
1.1.1 The Poincaré metric 3
1.1.2 Fixed points of automorphisms 10
1.1.3 Riemann surfaces 14
1.1.4 Hyperbolic Riemann surfaces and Montel's theorem 23
1.1.5 Boundary behavior of the universal covering map 28
Notes 34

1.2 *Boundary Schwarz's lemmas* 37
1.2.1 Julia's lemma and angular derivatives 37
1.2.2 Wolff's lemma and hyperbolic Riemann surfaces 50
Notes 57

1.3 *Iteration theory* 61
1.3.1 The fixed point case 61
1.3.2 The Wolff-Denjoy theorem 65
1.3.3 Hyperbolic Riemann surfaces and multiply connected domains 67
1.3.4 Common fixed points 73
Notes 79

1.4 *One-parameter semigroups* 83
1.4.1 The infinitesimal generator 83
1.4.2 One-parameter semigroups on the unit disk 89
1.4.3 One-parameter semigroups on Riemann surfaces 97
Notes 99

2. Several complex variables

2.1 *Taut manifolds* 103
2.1.1 Definitions and examples 103
2.1.2 Function theory on taut manifolds 111
2.1.3 Limit points of iterates 118
Notes 123

2.2 *The ball* 127
2.2.1 The automorphism group 127
2.2.2 Schwarz's lemma and horospheres 130
2.2.3 Korányi regions and the Lindelöf theorem 137
2.2.4 Angular derivatives 142
2.2.5 Iteration theory and common fixed points in the ball 150
Notes 155

2.3 *Invariant objects* 157
2.3.1 Invariant distances 157
2.3.2 Invariant metrics 168
2.3.3 Invariant volume forms 174
2.3.4 The Kobayashi distance in convex domains 181
2.3.5 Boundary behavior of the Kobayashi distance 183
2.3.6 Localization at the boundary 194
Notes 204
2.4 *Again iteration theory* 209
2.4.1 Taut manifolds 210
2.4.2 Horospheres 215
2.4.3 Convex domains 225
Notes 229
2.5 *Common fixed points* 233
2.5.1 Compact groups of automorphisms 233
2.5.2 Fixed point sets 237
2.5.3 One-parameter semigroups 241
Notes 248
2.6 *Complex geodesics* 251
2.6.1 Definitions and examples 252
2.6.2 An extremal problem 256
2.6.3 Convex domains 259
2.6.4 Strongly convex domains 267
2.6.5 Boundary smoothness 275
Notes 287
2.7 *Angular derivatives* 291
2.7.1 K-regions 291
2.7.2 The Lindelöf theorem 296
2.7.3 The Julia-Wolff-Carathéodory theorem in strongly convex domains 303
Notes 316
